# OFFPAD+

- FIDO2/WebAuthn
- Phishing-resistant MFA
- Passwordless authentication

# INTRODUCTION

OFFPAD+ is a cutting-edge biometric authentication device compliant with FIDO2 specifications, ensuring industry-leading phishing-resistant authentication. FIDO2 is a widely adopted industry standard supported by major online services like Microsoft, Apple, Google, and other leading online service providers.

## USER FRIENDLY

The built-in screen guides users through the authentication process and displays which service they are about to trust, enhancing the user experience and setting OFFPAD+ apart.

## PREMIUM

The OFFPAD+ FIDO2 security key is designed, developed, and assembled in Scandinavia, reflecting exceptional quality and attention to detail.

## PORTABLE AND CONVENIENT

Comes with a cardholder, allowing users to conveniently carry and keep track of the OFFPAD+ alongside their ID or access card.

## SECURE STORAGE

Credentials are securely stored on an embedded CC EAL 6+ Secure Element, providing top-tier security for up to 100 discoverable credentials.

## MULTIMODE USE

The device supports contactless use via BLE and NFC or wired via USB-C, with adapters for USB-A and Lightning — no need for multiple devices.

## SPECIFICATIONS

Standard	FIDO2
Certifications	FIDO2®, L1 Certified CE, FCC, ICC
Security algorithms	AES-128, SHA-256, ECDSA, ECDH, HMAC, RSA
Interface type	BLE (Bluetooth 5.0) NFC (ISO 14443 A/B) USB Type-C
Biometric sensor	SmartFinger® IDX3205
Screen	E Ink
Button	Physical
Working Temp	0°C ~ 45°C
Storage Temp	-20°C ~ 70°C
Working Voltage	5V DC
Size	86 x 54 x 2.5 mm
Weight	17g
